

ID : Diablo Wiki – Runa Tir

Tytuł : Brak poprawnego wczytania layoutu strony

Środowisko : Windows 10 Pro 21H2 (kompilacja 19044.2604), Firefox 110.0

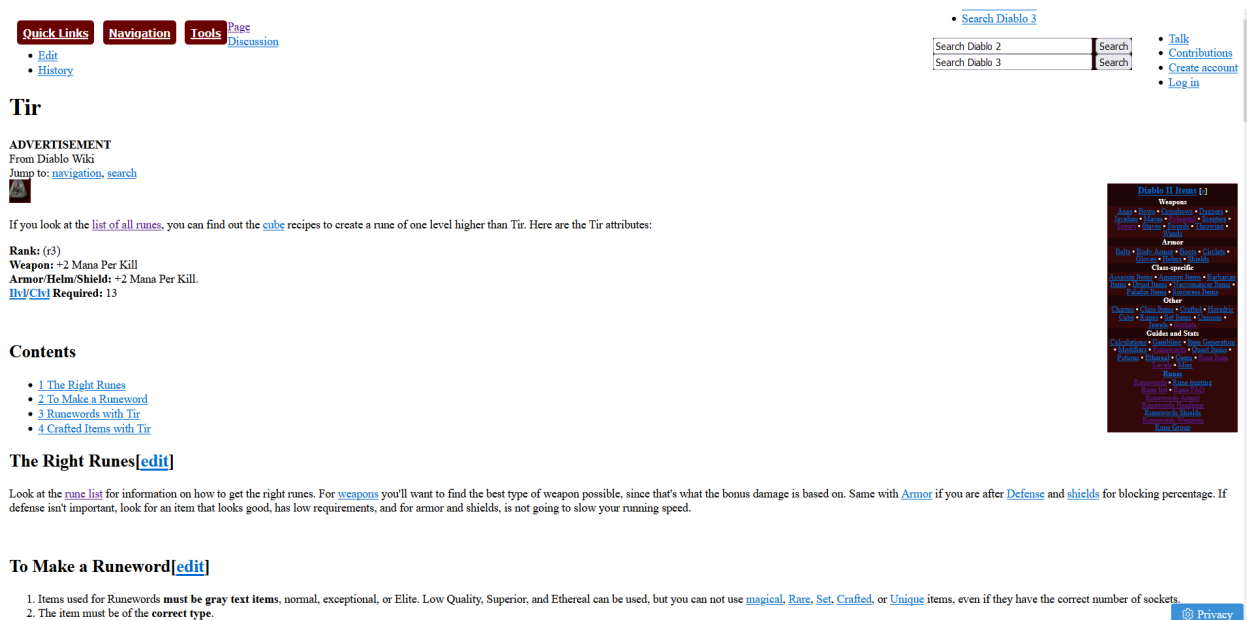

Opis : Po przejściu na podstronę opisującą runę „Tir” layout strony jest niepoprawnie wczytywany

Kroki do reprodukcji :

1. Otwieramy przeglądarkę internetową
2. W polu adresowym wpisujemy <https://diablo2.diablowiki.net/Grief>
3. Klikamy w odnośnik runy „Tir”, zaraz pod głównym tytułem strony „Grief”
4. Otrzymujemy stronę z niepoprawnie wczytanym layoutem

Oczekiwany rezultat : wczytanie podstrony z poprawnym layoutem, spójnym ze stroną główną

Aktualny rezultat :

The screenshot shows the Diablo Wiki page for the Tir rune. The page has a dark theme with a red header. The navigation bar includes links for Quick Links, Navigation, Tools, and Page. The main content area is titled "Tir" and includes an advertisement, a jump to navigation/search link, and a list of contents. The layout is broken, with some elements overlapping or missing. The search bar is at the top right, and the list of contents is on the left. The main content area is on the right.

Tir

ADVERTISEMENT
From Diablo Wiki
Jump to: [navigation](#), [search](#)

If you look at the [list of all runes](#), you can find out the [cube](#) recipes to create a rune of one level higher than Tir. Here are the Tir attributes:

Rank: (r3)
Weapon: +2 Mana Per Kill
Armor/Helm/Shield: +2 Mana Per Kill.
[lvl/Cht](#) Required: 13

Contents

- 1 [The Right Runes](#)
- 2 [To Make a Runeword](#)
- 3 [Runewords with Tir](#)
- 4 [Crafted Items with Tir](#)

The Right Runes[\[edit\]](#)

Look at the [rune list](#) for information on how to get the right runes. For [weapons](#) you'll want to find the best type of weapon possible, since that's what the bonus damage is based on. Same with [Armor](#) if you are after [Defense](#) and [shields](#) for blocking percentage. If defense isn't important, look for an item that looks good, has low requirements, and for armor and shields, is not going to slow your running speed.

To Make a Runeword[\[edit\]](#)

1. Items used for Runewords **must be gray text items**, normal, exceptional, or Elite. Low Quality, Superior, and Ethereal can be used, but you can not use [magical](#), [Rare](#), [Set](#), [Crafted](#), or [Unique](#) items, even if they have the correct number of sockets.
2. The item must be of the **correct type**.
